

SICOR VFR2000 Fire Fighter Helmet

COSEM is appointed as the official distributor for Italy SICOR Helmet in Asia and Middle East. This allows COSEM to market and sell a wide range of fire, rescue and anti-riot helmets, including the signature SICOR VFR2000 fire fighting helmet, in Singapore and Asia.

The SICOR VFR2000 fire fighting helmet is made of composite materials including Kevlar® and is designed in accordance to EN 443 standards. For greater strength, it has ribs with rounded edges both longitudinally and transversely. Its particular shape and build characteristics enable the absorption and redistribution of impact from blows and perforations.

Its internal shell comprises low density EPS and Dupond® Coolmax technology fabric for extra comfort while the chin stripes are made of fireproof type 6 nylon. It also includes an in-built clear polycarbonate mask with soft nose pieces according to EN 166 standard. Facial protection is guaranteed by two unique extractable visors which can be adjusted in different positions according to the shape of the wearer's face.

Specifications:

Width	: 261 mm
Height	: 203 mm
Length of screen & retracted visor	: 318 mm
