

Macaw™ Backpack (Miniaturized CAF Power)

In partnership with USA Intelagard, Inc., COSEM, an authorized agent for USA Intelagard, also distributes the Macaw™ Backpack in Singapore, Asia and the Middle East.

Originally designed for rapid attack in fire suppression, this miniature and portable Compressed Air Foam (CAF) dispersal system expands foams up to 70:1, depending on nozzle and foam solution used. The Macaw™ Backpack can effectively deploy liquid formulas, air aspirated foam and CAF with simple control adjustments. It is suitably used for emergency response professionals in all fields of services including volunteer fire personnel, forestry, wildland, military and industrial for fire, HazMat and Decontamination remediation applications.

The Macaw™ Backpack is proven to be highly effective for:

- Mop up and overhaul operations
- Hazardous material clean up
- Class A and B fire suppression
- Vapor suppression
- Decontamination operations
- Fires and spillages

Specifications:

- Ship weight : 30 lbs.
- Capacity : 5-gallon (18.9 litres).
- Available accessories include : 4500psi cylinder;
Fan tip nozzle; &
Piercing applicator tip.
