

Personnel Decontamination Vehicle (PDV)

The Personnel Decontamination Vehicle (PDV) is a 4-in-1 vehicle specially designed to handle mass-casualty and/or decontamination situations.

Apart from functioning as a troop and rescue-equipment carrier, its dual sheltered decontamination lanes can be speedily set up in less than 7 minutes to decontaminate about 60 walking casualties and 10 lying casualties in each hour.

Separately, the PDV can also be used as a large improvised ambulance to convey as many as 12 lying casualties at any one time to hospital.

Specifications:

Length	: 12,000 mm
Height	: 3,750 mm
Breadth	: 2,500 mm
Maximum Laden Weight	: 16,000 kg
